ERICOM
ACCESS DONE RIGHT

Access Windows Desktops & Applications from *Anywhere* using *Any Device!*

WITH ERICOM ACCESSNOW™ AND JUST A WEB-BROWSER, INSTANTLY TRANSFORM ANY MOBILE DEVICE, TABLET OR PC INTO A SECURE, ENHANCED REMOTE DESKTOP CLIENT

Empower users with the mobility and flexibility to access Windows desktops and applications hosted on Windows Terminal Services/RDS/VDI/physical workstations — from Windows PCs, Mac, Linux, iPad/iPhone, Android, Google Chromebook, BlackBerry — even locked down workstations!

WHAT IS ACCESSNOW?

Ericom AccessNow is a high performance HTML5 RDP client for accessing hosted Windows applications and desktops. It **runs entirely inside the browser,** using only standard web technologies.

REAL BENEFITS!

- **Lowers IT overhead, dramatically reducing windows PC software management load.** NO installation of client software or plug-ins (e.g., Java, Flash, Silverlight, ActiveX) is required on the user device.

- **Intuitive to Use — No more device issues.** Uses any HTML5-compatible browser, e.g., Internet Explorer, Safari, Firefox and others, without any client software to install.

- **Great user experience. With built-in acceleration, looks, works and performs** as well as a native RDP client, especially over the WAN.

- **Works seamlessly in managed environments —** Control who has access to what, while ensuring users can access all the systems, resources and business tools they need to be productive.

- **Automatic keyboard display,** enabling keyboard access whenever needed, for an improved user experience.

- **Secure data.** With AccessNow's unique web browser based approach, sensitive corporate data remains secure with no information left on the user device when the sessions ends.

- **Nothing complicated. Runs out-of-the-box,** without requiring any customization, installation or configuration.

- **Supports BYOD** (Bring Your Own Device) initiatives — Gives users the flexibility to access their working apps and desktops from their own personal device without requiring IT support of the device.

- **Ericom Secure Gateway (Free option).** Enables road warriors or home office workers to securely connect to internal resources from outside the firewall — no VPN is required.
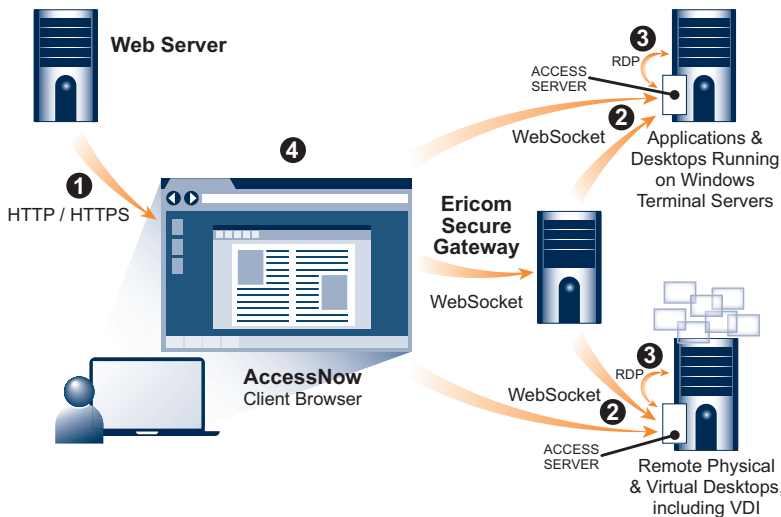

How Does AccessNow Work?

It's so simple! All you need is a Web-browser, and an internet connection.

- Open a web page
- Enter the address of the Ericom Access Server that you've installed (the Terminal Server or VDI platform)
- Enter your log-in credentials
- Click 'Connect' — The desktop (or application) appears directly inside the browser window
- That's it.

Ericom AccessNow Components

1. End-user navigates to the AccessNow URL to start the connection.

2. Client connects to Access Server using WebSockets — Access Server is usually installed on RDP host itself.

3. Access Server translates WebSocket communication to/from RDP.

4. Remote Windows desktop/application UI is displayed inside the browser window.

NOTE: Optionally, client connects to Access Server through Ericom Secure Gateway
